1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Christopher Dunham (22,031) on January 12, 2006.

The application has been amended as follows:

In claim 6, at line 31, after "by weight", please insert - - and the weight ratio of the squarylium-metal chelate to the formazan-metal chelate compound is from 80:20 to 60:40.

Please cancel claim 13.

2. The following is an examiner's statement of reasons for allowance: The claims are not anticipated by the prior art which relied upon the insitu formation of the mixed ligand squarylium metal complex. The declaration showing is now commensurate in scope with the coverage sought and evidences improved properties in the optical recording medium over similar media outside the scope of coverage sought. The comparison examples are closer to the claimed invention as they use mixed ligand squarylium metal complexes and are held to be at least as good as a direct comparison with the prior art which merely use mixtures of squarylium metal complexes which results in the formation of the mixed ligand squarylium metal complex in situ, but at a lower concentration.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
